TONIGHT Money-Balloon DANCE

Raymond Opera House
Friday, June 1st

Friday, June 1st, for the first time, local dance goers will have an opportunity of hearing Southern Alberta's new dance orchestra, King's Kanadiens, at the Raymond Opera House. This aggregation, numbering seven of Alberta's best musicians, gathered from various towns, has been practicing almost nightly for the big event, and those who have heard them, cannot say too much for the brand of dance music they produce. Friday's dance at the Opera House, the Money-Balloon Dance, will be an attraction that should bring numerous cars

from all points of the compass. It is safe to say that King's Kanadiens will prove to be the most outstanding orchestra ever booked for the big spring floor. Notwithstanding the high price demanded by this band of crack musicians the management has decided to keep prices as low as possible—per couple \$1.00 Extra lady 25c. Spectators (in gallery) 25c. A feature of the evening will be the shower of balloons, every balloon containing money. This dance will close at 12.30 o'clock. Please come early.

What of Our Dominion Day Celebration?

We heard "The Maple Leaf Forever" sung with fitting enthusiasm the other day. It did us good like a medicine. We forgot for a spell the prosaic grind of the workaday world and went for a frolic back through the years to the sunny time of our boyhood. Fervent thanks to the unselfish folks who spent a little time and treasure to help make that boyhood bright! But to go on. We found ourselves dreaming of Dominion Day. Back there in the little home town, dull enough in those hard pioneer times, there were nevertheless two glorious bright-letter days—Christmas Day and Dominion Day.

We started to long for Dominion Day some time in April. We began to wonder what clothes we would wear, what horse we would ride and what money we would spend, for flags, ice cream, fire crackers, oranges and other things dear to boys. And, as we remember, not once did the good folks disappoint us. The booming blasts disturbing the hillside at 4.30, the shrill clear, throbbing strains of the little town brass band firing the soul with holiday spirit, from 7.30 in the morning until evening fall

the parade floats, gaily decorated teams and prettily clad riders and marchers, the races and other lively enthusiastic sports, the ball game, the whole hearted merriment and down right good cheer of it all. Its hard to imagine oneself anywhere nearly so good or happy or hopeful, if the stirring memory of it all did not lie down there in one's make-up warming his being always!

What of the kiddies who live in our town this year? Hundreds of them will be warmed or chilled this first of July according as you and I, fellow citizens, act. And hundreds of older children will be wiser, happier, more hopeful, more patriotic, richer and more proud of Raymond; or will be, of all these good things, the opposite. No town of our size in Canada has better, more talented people, none has more or better leaders, few have more time or wealth. What shall we do about it? Let George do it? George, we fear, has grown tired of doing it? Well? And again, good people of Raymond, well?

Whatever we do, let's catch the Dominion Day spirit. "He gives nothing but worthless gold, who gives from a sense of duty".

Raymond, N. Dayton and Cardston at Top of S. Baseball League

By defeating Stirling 9-2 on Wednesday in the season's first league game fixture the Raymond baseball nine started off the season alongside the league topnotchers. Lee Browerton pitched a strong, consistent game for the nine innings, and easily won from Russ Nilsson, who held the mound for Stirling. All of Stirling's runs were made on errors.

NOTES

Two base hits were made by Lee Browerton and Glenn Tollerup.

Roi Stone played a good game at short stop and at the bat. Likewise Joe McLean, who handled third base.

Harry Fairbanks on first base played errorless baseball despite the evening sun in his eyes.

Cliff Nalder attended strictly to managerial duties and did not enter the game.

Warhorse Hicken played his old steady game behind the bat, kept Stirling from stealing second, but made one overthrow.

Errors were frequent on both sides. Stone, McLean and Workman chalked a couple each.

New Dayton won from the Lethbridge Miners 6-3. Cardston blanked Magrath 8-0.

5-Car Caravan Will Leave Tomorrow for S.L. City Conference

A caravan of five cars will leave here tomorrow for the Salt Lake conference. They are: Alvin Jones, driver, Mesdames A. P. Jones, E. Terry, Irene Redd, and L. Bacon. Mrs. W. Brown, driver, Mesdames Ada O'Brien, Verna Phillips, Ruby McMullin, and Miss Lillian Hicks. Andrew Walton, driver, and wife, Mrs. M. Boyson, Mr. and Mrs. Ira McBride. Ammon Anderson, driver, and mother, grandma Hancock (age 72), Mrs. Wm. Anderson and Mrs. Harker of Magrath. Clarence Elder, driver, and wife, Misses Elizabeth Schneidt, H. Schneidt, Fern Wildo and E. Wilde.

Among those who will take the train tomorrow to attend the Salt Lake conference are: Mesdames L. D. King, Ruth Stevens, Hulda Cardwell, H. Christensen, L. Alston, Mrs. Harker, Hounie Nalder, Misses Alice Evans, Delvoir Mel-drum and Agnes Salmon.

BORN—To Mr. and Mrs. Alvin Jones, a daughter.

FOR SALE—Good, young horses, broke or unbroke. Weights from 1200 to 1500 lbs.—Apply to Alf Erickson, Raymond. j 4.

For Sale FURNITURE AND TENT

One \$85 all leather Davenport, like new \$50. One \$25 Library Table, like new \$10. One \$135 Monarch Range used only 6 mos. \$85. One bed with 50-lb Sana Felt Mattress and Sagless Springs \$20. Mattress alone is worth the money. This furniture has been used but a short time and it will pay you to inspect it. Also one Light Buggy in good shape \$25. Auto tent, a bargain for \$10.—Arthur C. Nilsson, Raymond.

Frididaire

Refrigerator

The Preservation of Food is an important item in every household.

Ten cents out of every dollar the average housewife spends for food is wasted on account of spoilage.

Frididaire is a modern means of refrigeration. It ideally preserves all perishable foods entrusted to its care—and it preserves these foods for a long time. Frididaire furnishes a dry cold atmosphere that is always below 50 degrees. The Frididaire frost coil is 12 degrees colder than ice—and never melts.

Eternal Vigilance Is the Price Of Safety

Because of the appalling loss of life through motor car accidents, Governments and municipalities are enacting ever more stringent laws governing the use of highways and the operation of automobiles. Laws regulating the speed of driving, governing the use of headlights, compelling cars to come to a full stop before proceeding to cross railway tracks have been passed, while signalling devices, signs, guard rails at curves, embankments, and other danger spots are erected—all with a view to protecting the public.

For the same reason laws are passed and regulations enforced governing the management of factories, mines, operation of railways and ships, laying down conditions under which women and girls may be employed, and stipulating a hundred and one things which must be done to safeguard workers in all departments of industrial life.

According to figures, the correctness of which are vouched for by the Midwest Safety Conference, as reported in a San Francisco paper, there were 21,000 deaths in the United States last year through traffic accidents, and 23,000 deaths through industrial accidents almost all of which were preventable.

But it will be a surprise to many to learn that accidents occurring in the homes of the United States took an even greater toll of life than did traffic accidents, or accidents in industry. Avoidable accidents resulting in death in United States homes in 1927, numbered 27,000, and, according to the report already referred to, "the bathtub and the step ladder were among the deadliest adjuncts of domestic life, and the two combined contributed a large proportion of these 27,000 home fatalities."

Traffic regulation and industrial safety laws are the business of the public as well as of the individual; hence the interest displayed by all governmental authority. Because they are susceptible of public regulation the problem they present, and which fills the newspapers today, should be easier than that of the household fatalities. As the San Francisco paper says, "It is not possible to put the equivalent of a traffic cop into every home to supervise the hanging of draperies, the dusting of walls and the training of the rhinoceros vines. Nor would it be desirable even were it possible to have a uniformed public official handling careless people in and out of slippery bathtubs. The law cannot direct the tuning on and off of gas cocks. It cannot keep matches out of the reach of children. It cannot be the keeper of the family medicine chest. It cannot make itself the custodian of the household arsenal and see that unloaded guns are always unloaded. It cannot prevent the starting of stove fires with kerosene, or the use of gasoline near a lighted lamp or a burning fire."

These and a multitude of other vigilances rest solely with the individual. Until the individual exercises the necessary caution the lurking dangers of the household will continue to take their toll.

Throughout this great Canadian west not a week passes but the newspapers tell the terrible story of a calamity in some home, resulting in death and maiming for life, the direct result of downright carelessness. A destructive prairie or forest fire rages because someone neglected to put out a camp fire, or dropped a match, or started burning straw or rubbish without taking necessary precautions. An explosion wrecks a home and takes a toll of life because gasoline was left where it should not have been. A child drinks a cup of lye in mistake for water, and dies or is crippled for life. And so on, and on, and on.

And all the laws, and regulations, and prohibitions that all the Parliaments, and Legislatures, and Municipal Councils in the country may pass cannot stop these tragedies. In the forceful slang of the day "it is up to the individual" to exercise caution, to be vigilant. Only so can the daily loss of life through these accidents in the home, in industry, and on the highways of our country be reduced and practically eliminated. Ninety-nine out of every one hundred of such accidents are preventable. It is for the people to realize this. When they do the accidents will cease; until they do realize it and govern themselves accordingly, sorrow, pain and loss will continue to be a permanent visitor in our midst.

Named After Lindbergh

Canadian Island and Station Will Bear Aviator's Name

Colonel Lindbergh will have the honor of having an islet in British Columbia and a station in Alberta named after him. Paul Lambert, of New York, owns a small island in Seattle Bay, near Nanaimo, B.C., and asked the Geographic Boards of British Columbia and Canada to approve of the name Lindbergh for it. Neither board has objected. They claim as private property he can call it what he likes, as long as it doesn't interfere with present names.

The Dominion Geographic Board received an application from the Canadian National at Winnipeg to approve naming a railway station in Alberta after the famous aviator. The board has given approval.

If a thing must be done there is no time like the present for doing it.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

parts. You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

World's Grain Congress

Will Mark Fiftieth Anniversary Of
Coming Of The Railway And Birth
Of Prairie Agriculture

The first world's grain congress scheduled for Regina, in 1932, will mark the 50th anniversary of the arrival of the Canadian Pacific Railway and the birth of prairie agriculture, outside of a comparatively small earlier settlement in Manitoba. In outlining steps preliminary to the summoning of the congress, Hon. W. R. Motherwell, Federal Minister of Agriculture, announced: "The proposal to hold a world's grain congress in Canada has been quietly discussed and canvassed by a few enthusiasts in the west for the past two or three years. In the meantime, the pronounced success of the world's poultry congress has stimulated and crystallized the proposed grain congress into possibility and visibility."

NEW STRENGTH FOR ALL WEAK GIRLS

Comes From the Rich, Red Blood
Made By Dr. Williams' Pink Pills

There must be no guesswork in the treatment of pale, anemic girls and children. If your daughter is languid, has a pale, sallow complexion, is short of breath after slight exertion or on going up stairs, if she has palpitation of the heart, a poor appetite, or a tendency to faint, she has anemia—the medical name for poverty of the blood. Any delay in treatment may leave her weak and sickly for the rest of her life. When the blood is thin and watery give Dr. Williams' Pink Pills, coupled with nourishing food and gentle out-door exercise. The new, life-giving blood which comes from a fair use of Dr. Williams' Pink Pills, increases the appetite, stimulates the nerves and brings a glow of health to pale cheeks. Mrs. Robert Jackson, R.R. No. 5, Shelburne, Ont., praises this medicine for restoring her daughter's health. She says: "When my daughter was nine years old she was so weak and thin that we feared we would lose her. She was very nervous, and going to school seemed too much for her. Often she would have to stay at home for days at a time. At times she would have a very high fever, and the doctor's treatment did not help her. I tried several remedies, but with no good result. One day a friend advised me to give her Dr. Williams' Pink Pills, and I did so. It was not very long after she began taking the pills that I could see a change for the better. She kept on taking the pills for several months, and through them grew into a strong, healthy girl. Since then, if a tonic has been needed at any time, it has always been Dr. Williams' Pink Pills."

The pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Wireless Saved the Situation

Egypt Able To Greet Afghan Ruler
With His National Anthem

A very embarrassing situation was averted and Egypt greeted King Amanullah and his queen with proper ceremony upon their arrival from Bombay, thanks to wireless.

A frantic message picked up by the P. and O. liner Rajputana, from an Egyptian operator, bemoaning the fact that Egypt was not acquainted with the Afghan national anthem. The purser had it wireless to Port Said, where it was deciphered—note for note—and upon the arrival of the royal pair they were greeted with a perfect rendition of their anthem.

Cheapest Of All Oils.—Considering the qualities of Dr. Thomas' Electric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Fort Vermilion Wheat

Wheat Grown Close To Arctic Circle
Weighs 64 Lbs. To The Bushel

Wheat from Fort Vermilion, 250 miles north of Peace River, weighed 64 pounds to the bushel and graded No. 2 without dockage. It was sent to the Alberta wheat pool by James McGraw, a farmer in that district. Although Fort Vermilion is close to the Arctic circle, wheat growing is not new in that area. In 1876, wheat grown at that point won the championship at the Centennial Exhibition at Philadelphia.

Ideal Tourist Camp Of Calgary

The Calgary Automobile Club is planning to equip and operate what they claim will be the most modern automobile tourist camp in Western Canada. The camp will be well lighted and equipped with gas for cooking, water, shower baths, car shelters and other conveniences for the accommodations of motor tourists.

Insist on Minard's Lintment—accept no other.

W. N. U. 1734

PILES are quickly Soothed & Healed by Zam-Buk

British-American Friendship

Chas. M. Schwab Says The British
Are The Most Sincere People
In The World

In an appeal to abolish the "hands across the sea" sentiment between Great Britain and the United States, Charles M. Schwab said at an English-speaking union luncheon that the two nations are knit together not only sentimentally but actually, and that a large factor in this union is the steel industries of the two countries. He said that Great Britain was the mother of the steel industry, but that the great British processes, including the Bessemer process, were developed in America.

"I consider the British the sportiest, truest, most sincere people in the world," Mr. Schwab said. "Nobody knows what they have suffered from the great war, and what they are now doing to get back on their feet. I am proud of my British friendship. I have received more honor from Great Britain than from my own country."

"I am not disturbed by the boastful, flamboyant Americans who falsely represent America abroad, and I am not disturbed by our newspapers cause I know that the relations between us are not affected by such things."

First Thing Man Exploited

In 1300 B.C. Hittites Had Laws
Governing Bees

The bee was probably the first created thing whose labors were exploited by mankind.

In the Hittite code of laws, dated 1300 B.C., punishments for the theft of bees and hives were mentioned. About 4000 B.C. the bee was adopted as the symbol for the King of Lower Egypt. Hieroglyphic bees were found from the First Dynasty down to Roman times, a period of some 4,000 years.

Bee-keeping was regularly practised in Egypt in 2600 B.C.; reliefs exist showing the conformation of the hives—and structures placed over the other—and the men engaged in pouring out the honey and sealing it in jars. But thousands of years before this the wild honey was extracted from rocks and trees. It was only in comparatively recent times, some six or seven thousand years ago, that it occurred to man to reduce the bee to slavery.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Increase In Tobacco Production

Production of tobacco in Canada in 1927 totalled 43,916,700 pounds valued at \$9,112,278, an increase over 1926 of 15,092,700 pounds in production, and \$1,732,798 in value. Last year 41,028 acres were sown to tobacco in Canada or 10,672 acres more than the previous year. Ontario planted 23,650 acres, Quebec 10,015 acres, and British Columbia 260 acres. The average yield per acre was 997 pounds.

WOMAN SO SICK COULD NOT WORK

Helped by Taking Lydia E. Pinkham's Vegetable Compound

Grainland, Sask.—"I am glad that I heard of that good Lydia E. Pinkham's medicine and I will not be without it again. I was so sick that I could not work at all and could not sew on the machine. My aunt told me of Lydia E. Pinkham's Vegetable Compound and now I am telling all of my friends how good it is and I will answer all letters I get from women."

—MRS. MARY SCHULTZ, Grainland, Sask.

Preparing For Trial Flights

Luxurious British Airship Built For
London-New York Traffic

From New York to London in 48 hours, and with all the comforts of the most luxurious ocean liner!

This may sound like a dream of Jules Verne but it will be accomplished this year by the R-100, a British airship, built under direction of Commander C. Dennis Burney, M.P.

The Burney ship, of 5,000,000 cubic feet displacement, has progressed so far that it is expected to be ready for trial flights in July.

American capital has become interested in the R-100 and a Detroit group has taken an option on a substantial interest in the Burney Company with a view of establishing a fleet of six 5,000,000 cubic feet air liners built on the Burney designs and for use in London-New York traffic.

Half of these ships will be built in the United States and half in England with the operating company owned jointly by British and American capital.

The R-100 will carry 100 passengers and ten tons of express freight. It will be able to make the eastward passage in 48 hours and the trip from London to New York via the Azores in 60 hours. The southern route on the westward passage is contemplated to avoid head winds.

If plans for the trans-Atlantic airship company materialize, the R-100 will be used as an experimental ship, followed by the larger dirigibles with capacities for 140 passengers and 20 tons of freight.

The R-100 has been furnished, the staterooms are completed and rugs have already been laid in the dining salon.

Most Unusual Job

Going Through Hotel Waste Paper
Baskets To Retrieve Lost
Articles

Waste-paper baskets sifting is an unusual job, but one that is highly important in large hotels. Most lost articles are found in waste-paper baskets, and in some hotels there are people who spend most of their working hours going through the vast quantities of papers and cast-off articles placed in waste-paper baskets by guests. Many thousands of dollars' worth of jewelry, valuable papers and such things as theatre tickets, railroad and steamship tickets and pieces of wearing apparel are discovered every month. One of the most expensive methods in the world, owned by a guest who wears it as a pendant, was picked up in waste-basket rubbish less than a month ago. Recently, too, there were two \$100 bills found in the trash that was sent down from a guest room.

As a veritable an excellent preparation is Mother Graves' Worm Expeller. It has saved the lives of countless children.

First Elevator In Angola

Another Western Importation Added
To Turkey's New Capital

The first elevator has been placed in one of the buildings of Turkey's new capital.

This another red-letter day has been added to the series commemorating the construction of the first new house in the erstwhile village, the first turning of the tap of the new water system, the first puff of heat from the first steam radiator and the first switching on of electricity.

But the elevator, latest importation from the West, does not elevate as yet, for the Minister of Hygiene in whose new headquarters it has been installed has not yet been able to find any one in Angola capable of testing and setting it in motion.

Preserves Water Supply

Forests are nature's preservers of water supply. The forest floor, being porous, retains the maximum amount of rainfall. This physical condition combined with the mechanical obstructions of tree roots, retards the rapidity of run-off. Excess water is released gradually and the equilibrium of stream flow is preserved. In like manner the melting of snows in the springtime is delayed by the lower temperature and shade in the forest, so that the danger of floods is lessened.

Landlady: "You have been here three months and have never paid any rent."

Student: "But you said it would be like home here!"

Landlady: "Well, I hope it is."

Student: "At home I never paid any rent."

Thrift is a state of mind. A man buys a \$500 car as an example when he wants a \$5,000 car and can afford no car at all.

Always have the magic
WRIGLEY package in
your pocket.

Soothes nerves, allays
thirst, aids
digestion.

Are Aids To Scientists

Rats and Monkeys Contribute To
Knowledge Of Dietetics

Rats and monkeys are, in their humble way, contributing much to the knowledge of scientists regarding dietetics, says an article in TIT-BITS.

At the famous Lister Institute in London, is to be found a modern "Pied Piper" in the person of Miss Henderson Smith, who has charge of some 500 rats of all ages and sizes, which occupy a regular nursery.

People come from all over the world to see Miss Henderson's charges. They come with shudders of horror at the thought of so many "beasties" in so small a space, but they go away charmed with the little creatures.

You must not imagine that these are ordinary rats. They are nearly all black and white, though some are entirely white with pink eyes. They are tame and friendly, and if they do occasionally give a little bite—it is kindly meant.

The rats and ten monkeys near by are doing extremely important work. They are teaching scientists all about the mystery of the all-important vitamins and are contributing daily to the knowledge of dietetics.

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Post Office Thus Big Job

The Canadian Post Office Department delivers over 600,000,000 letters, 250,000,000 newspapers, 400,000,000 circulars, and 40,000,000 parcels annually in Canada, according to a report from the Department. This delivery is made through about 12,140 post offices, and over 200,000 rural mail boxes extending over an area of nearly 3,700,000 square miles.

Don't Make a Toy Out of Baby —Babies Have Nerves—

By RUTH BRITAIN

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scolded, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhoea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

Hon. Vincent Massey Speaks On Peaceful Relations Between Canada And The United States

"The peaceful relations between Canada and the United States are founded on practical principles," said Hon. Vincent Massey, Canada's minister of the United States in a speech before the American Peace Society, delivered at Cleveland.

In conveying the greetings of Canada, Mr. Massey said that he happened to be the only representative of British America present, and he might be permitted to add to Canada's good wishes those of Newfoundland, the British West Indies and all the countries in America which owe allegiance to the British crown.

Canada and the United States, said Mr. Massey, had gone a long way towards a solution of the problem of peaceful neighborliness.

"We may point with some pride to a tradition of tolerance and common sense in our dealings with each other," he said. "It is true in our enthusiastic moments we refer to our peaceful border in unrestrained imagery, but underneath our rhetoric there is solid fact. No two nations can point to an achievement like that of the international joint commission, which for fifteen years and more has been settling intricate and delicate questions in connection with the waters on our boundary line. It is a matter for deep satisfaction that, in a long list of cases there can be discovered no instances where dissatisfaction has arisen over the orders of this body. Its orders have never

been disobeyed, although it possesses no powers of police to enforce its orders. What a triumph in international co-operation there is in this fact, that in all its cases this commission has never divided along national lines, and only once was it divided at all! We may well regard the work of this body as an impressive example as to how two neighboring nations, which are accustomed to trust each other, may deal with common problems."

This principle of arbitration in Canadian-American relations has been embodied in the policy of both countries since the Jay-Greenville treaty of 1794, providing arbitration as a means of settling boundary disputes, Mr. Massey pointed out. The principle then set up had been scrupulously observed ever since.

The Canadian minister expressed great faith in the practicability of the various peace movements now going on throughout the world. In spite of the sceptics, the road to peace was open.

"More human beings are now bent on preventing wars; more people are thinking in terms of peace, than ever before. Governments are directing their energies to this end as they never have done in the past. Do we hear more of war? The fact is that we are more conscious of the cruelty and futility of war than ever before, but there lies the hope that the consciousness of a disease is the first step towards its diagnosis and cure."

WILL HAVE CHARGE OF WOMEN'S SPORTS

Adhering strictly to the policy that women's sports should be handled exclusively by women, the Canadian Olympic committee accepted the recommendation of the Women's Athletic Federation and appointed Miss Marie Parkes, chaperone, and Miss Alex. Gibb manager. They will have charge of the women track and field athletes on the trip to Amsterdam. There may be some girl swimmers recommended by the Canadian Swimming Association, and if so they will

be in charge of the ladies appointed, both of whom are eminently qualified for the position. Miss Gibb has been an outstanding figure in girls sports for some years and was manager of the Canadian ladies' team in 1925, which visited England. Miss Parkes has been actively associated with women's sport at the University of Toronto and with the Women's Federation of Canada, of which she has been secretary since its formation.

FINDS HAPPINESS

Malka Men Selmulder, eight years old, a Polish orphan, who travelled 7,000 miles alone to find a new home. On her arrival at the Canadian National Railway station, Winnipeg, she was met by her new parents.

W. N. U. 1731

Want Air Port Chief

First Time Such a Position Has Been Advertised

Probably the first advertisements of their kind are in process of issue by W. Foran, secretary of the civil service commission, as a result of the decision of the Department of National Defence, to hold competitions for the positions of air harbor manager, at the St. Hubert airdrome, near Montreal, and inspectors, civil aviation, at Ottawa. The air harbor manager will have charge under the superintendent of airways, of a public licensed air harbor, including the flying field or water surface, hangars, slipways, workshops, etc., at St. Hubert, will collect all operating fees, supervise aerial traffic and co-operate with customs officials at the port.

Qualifications for the post include a license as commercial pilot and air engineer, and wide knowledge of the different types of aircraft.

"Walter, there is a fly in the soup."
"Well, after all, a fly can't drink much."—Jugend, Munich.

Seeing Sights the World Over

Possibly you have a friend who was a passenger on the round-the-world cruise of the Canadian Pacific Steamship "Empress of Australia." If so, you have already heard the stories of ports visited, and the strange sights witnessed. In clubs, homes, and lecture halls you will hear about where the passengers saw the largest Buddha in Japan, how the Whampoo River, China, looks in the moonlight with its queer craft silently scurrying with unknown cargoes to and from various ports, while from the cabin comes the wailing of the Chinese flute.

Then there is the spectacle of the mongoose in conflict with a huge cobra, a battle royal in which the former is always the victor, usually through his habit of securing a good hold with his mouth and crushing the head of the snake. Another interesting thing is to see the Illudoo with

its flute charm a deadly poisonous snake, finally playing on the musical nerves of the reptile to such an extent that he gradually sways from side to side in accompaniment to the Oriental music. Photo shows a motor of the desert being carefully shaved by his attentive chauffeur, incidentally the owner looks over the camel's teeth to see if any are in the stage where pulling is necessary. Inset gives a silhouette at sunset on the River Nile.

Greatest Aids To Agriculture

Industry In Canada Has Received Most Benefit From Non-Farmers Agriculture's greatest aids in Canada during the last 50 or 70 years have come from men who have never farmed, J. H. Evans, deputy minister of agriculture for Manitoba, told the Legislature recently.

"A doctor who had never farmed learned in 1850 that wheat rust had different spores, and if these could be destroyed the fungus would be eliminated," Mr. Evans said. Pathologists had been using that information as a basis for research ever since.

Pasteur, the French chemist and scientist, had brought immeasurable benefits through his "pasteurization process," evolved in 1857 to aid wine-makers whose products were spoiling. William Sanders, a druggist, had hybridized many brands of wheat to select the best and produce the grade known as Marquis.

Mr. Evans asserted that it was not very encouraging to the farmers, after years and much money spent to grow better seed and better stock, to have to sell these products for a low price "dictated by the businessmen."

The Canadian Rocky Mountains consist geologically of the upturned edges of the strata underlying the Great Central Plain of North America.

Some men drop all of their money trying to pick up more.

Mineral Springs Of Canada

Spring Water With Curative Powers Occur In Many Parts Of Dominion

The production in mineral waters in Canada in 1927 amounted to 303,529 gallons, valued at \$14,686, and was derived from mineral springs located in Ontario and Quebec. Spring waters containing minerals in solution, or as they are usually termed, mineral waters, occur in many parts of the Dominion. Many of them are utilized commercially, both as potable waters and for bathing purposes. At several of the springs where the waters have curative properties, hotels and sanatoriums are operated. Some of the thermal springs are utilized principally for mineral baths.

Shorthorn Cow With a Record U. A. Roan Lady, 101st,—168547—a registered Shorthorn cow in the herd of the University of Alberta, Edmonton, recently completed a 355 day test during which she produced 15,428 pounds of milk with an average test of 4.3 per cent., making a total of 664 pounds of butterfat. This record places her sixth highest in Canada in point of butterfat production for Shorthorn cows.

No young man can succeed if he is afraid to do a little more than he is paid for.

The notes to which the strings of a violin are tuned are G, D, A, and E.

Canadians Living In U. S. Will Erect Memorial At Ottawa As A Confederation Gift

Perfect Simplicity

A sports dress is smartest, of course, when it's simple. Style No. 837 is extremely popular. It is particularly fetching, made of striped novelty sheer woolen with the stripes reversed for the front panel. The belt is attractive slipped through openings and tied at side. It can easily be made in an hour and only requires 3 yards of 40-inch material for the 36-inch size. Two surfaces of crepe satin, printed and plain silk crepe, and georgette crepe in two-tone effect, are lovely combinations. Pattern is obtainable in sizes 16, 18 years, 20, 22, 24, 26 and 28 inches bust measure. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

The average man is ready and willing to die for his country—of old age.

NEW CONFEDERATION BUILDING

Work on the new Confederation Building at Ottawa, of which the foundation stone was laid by Lord Willingdon on Confederation day last year, will be started this year. The building, which is to house government departments, will be of French chateau architecture, which will harmonize with the Chateau Laurier at the other foot of Parliament Hill. The plan resembles a broad arrow, with a main wing of 250 feet on Wellington street and a side wing of 200 feet along Bank street, a third wing bisecting the angle. The Dominion has hitherto been paying out \$600,000 annually in rents for government departments, many of which are now accommodated in old houses or store buildings.

A sketch of the May memorial to be erected in the Parliament Buildings at Ottawa, as a Confederation gift from Canadians residing in the United States, has just been published in New York. The sketch, submitted by Dr. R. Tull McKenzie, of Philadelphia, and approved by the National Memorial committee, symbolizes the development of Canada.

Four figures occupy the immediate foreground. On the left is Canada enthroned, her right hand on a shield emblazoned with the arms of United Canada of today, her left outstretched to receive the offerings of her children. She wears a head dress with earlobes and the short chiton and sandals of Diana; a youthful girl-like figure, the youngest of the Nations.

The central figure is a small child, the Canadian of the future, staggering under the weight of the wheat sheaf he is bringing. Behind him and partly supporting him is a stalwart youth, the Canadian of the present, relinquishing his rifle and looking forward to peace and industry. Behind him a young woman kneels and receives his rifle with one hand and with the other pours out from a basket the fruits of the earth at Canada's feet.

The engineer is stepping down into the foreground with a theodolite on his shoulder. At his heels come, in procession, the lumberman, with his axe, and the fisherman with his nets, established on both coasts before the land was settled. Farther back at the side is seen a group; a man, with a hunter's rifle, and a woman and child, standing among the trees in front of the settler's cabin. On the opposite side an Iniquila Indian looks in the forest watching them.

The upright pine trunks form a frame through which is seen the figure in low relief of Jacques Cartier on the deck of his ship, as he calls up the St. Lawrence. Kneeling behind him a Jesuit priest upholds the cross, a reference to the religious character of the first settlement of Canada.

The relief of the figures becomes lower as the history recedes but the figures on the foreground stand out boldly, almost in the round.

The panel is about ten feet square and is supported on a pedestal about three feet high on which the inscription will be carved.

There are approximately a million and a quarter men and women of Canadian birth resident in the United States. To give expression to their sentiments of pride in and devotion to their native land this memorial at Ottawa was proposed. The sixtieth anniversary of Confederation, celebrated last year, provided a fitting opportunity to present it. It will be erected at a cost of \$50,000, the amount to be raised by popular subscription among Canadians residing in the United States.

Through the courtesy of the Canadian Government the most desirable site within its gift was made available to the Memorial Committee and accepted. This location is a large panel in the main corridor of the Parliament Buildings leading to the Hall of Fame and opposite to and balancing the Memorial group already erected there to the Nursing Sisters in the Great War.

Time was of course too short to consider the erection of the Memorial itself for unveiling at the Jubilee ceremonies in Ottawa on July 1, last. A temporary tablet was therefore made, placed within the panel the memorial will occupy and in the presence of His Excellency Viscount Willingdon, Governor-General of Canada, the Right Hon. W. L. Mackenzie King, Prime Minister, and a distinguished gathering, solemnly unveiled and formal presentation made by W. W. Colpitts as chairman of the National Committee. The gift was gratefully accepted on behalf of the Canadian people by the Governor-General and the Prime Minister.

"The Tablet reads:
"In the sixtieth year of the Confederation of Canada and in commemoration of this event Canadians who live in the United States will cause a memorial to be erected here in token of their devotion to the country of their birth and as a proud tribute to the achievement of its foundation."

Truth Essential To Success

I find great pleasure in a truthful man. One can depend on what he says, and learn from him. But no one pays any attention to a liar, or much respects him. I have never known a really successful man who was a liar. Men of that disposition soon learn if engaged in real affairs successfully, that untruthfulness is a drag, like a suit of clothes when in swimming.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Hall Caine, novelist and dramatist, Grebra Castle, Isle of Man, celebrated his 75th birthday recently.

Tin has been discovered in Northern Manitoba according to a wire received by Premier J. Bracken from a prospector named Vina A. Lacker, of The Pas, Man.

The House of Lords unanimously adopted a resolution presented by Lord Renshaw that the proposals for the outlawry of war, presented by the U.S., should have prompt and favorable consideration.

Sir Frederick Stupart, director of the meteorological service of Canada, and of the Toronto Observatory, will retire at the end of the year. He had been connected with the service for more than 55 years.

Scandinavians who last year visited Canada and returned to their own country for the winter months, are now returning in large numbers to take up land in Northern Saskatchewan, officials of the Canadian colonization department announce.

Now York newspapers say that a new national transportation system, using both aeroplanes and railway trains, which it is hoped will eventually link New York and the Pacific Coast on a 48 to 52 hour schedule, is being planned.

Over \$300,000,000 has been paid out by Canadian mines in dividends and bonuses up to the end of 1926. To this British Columbia mines contributed \$69,375,000; Ontario silver mines, \$96,239,952; Ontario gold mines, \$60,546,634, and nickel mines, \$94,722,452.

Cheques amounting to over \$18,000 have been distributed among beet growers of southern Alberta by the Canadian Sugar Factories, Limited. This represents an additional payment of 50 cents a ton for 1927 beets, bringing the total amount paid for last year's deliveries up to \$7 per ton.

Pays Smallest Income Tax

The smallest income tax payment in Canada is believed to have been remitted by a taxpayer in Toronto, whose tax totalled two cents, according to officials of the Federal income tax department. His taxable income was less than \$1 and he paid it with a two-cent postage stamp.

Will Open Marble Quarry

Marble found near the Hudson Bay railway north of The Pas is being investigated by a group of Winnipeg men with a view of opening a quarry.

Harry Buss's Back bothered him for over 17 years

Then Gin Pills
relieved his pain

Harry H. Buss of Egmont, B.C., suffered from a lame back for over 17 years. Every spring he was laid up from work. He tried many remedies, but could not obtain relief. He was advised to try Gin Pills and immediately obtained relief. Read his letter:

"There is nothing to compare with Gin Pills. I suffered unceasingly with a lame back for over 17 years. I tried almost everything, even to hot poultices. I could not sleep. After taking two and a half boxes of Gin Pills I am at work again and feel fine as a fiddle. I will not be without Gin Pills from now on. I am telling everyone in this settlement who has kidney or back trouble to give Gin Pills a trial. Publish my letter as I would like others to know what great relief Gin Pills gave me."

Pains in the back, constant headaches, swollen joints, painful urination, murky urine, brick dust deposits, scanty or too frequent voiding of urine are all symptoms of kidney trouble. Relieve your suffering and ensure a future free from kidney ailments. Get a box of Gin Pills today. 50¢ at all druggists. National Drug & Chemical Co. of Canada, Limited, Toronto, Canada.

Farmers' Marketing Tour

Canadian National Railways' Tour
To Great Britain and
Denmark, 1928

We reached Plymouth in the early morning, while it was yet dark. How strange to find our ship suddenly still after days and nights of throbbing movement. How eager we were to get ashore to feel our feet at last on English soil.

Our itinerary promised us great things, but who would have imagined an official reception at the hour of 7 a.m. We were scarcely ashore when we found ourselves greeted by the Mayor of Plymouth (Councillor W. H. J. Priest) who warmly bade us welcome to Plymouth and England, awakening that sense of kinship which we were to feel more and more deeply every day of the tour.

Here also we made the acquaintance of Mr. E. A. Weir, organizer of the programme and itinerary, and Mr. J. M. Johnson, European Colonization Manager, of the Canadian National Railways, London. Our programme told us that we were to have landed at Liverpool, but circumstances had ordained that we should have the pleasure, not only of seeing the historic town of Plymouth, but of travelling through some of the most beautiful countryside that the west of England can boast.

We were taken to Plymouth Hoe. We were shown where Drake finished his game of bowls before going to fight the Spanish Armada. We saw the spot where the Plymouth Father's embarked, and the ladies of our party were taken for a private motor tour over the moors of Devon.

We could have had no better introduction to the beauties of the Old Country than our trip from Plymouth to Liverpool, for it took us through Devon, Somerset, Monmouth (by way of the Severn Tunnel), Hereford, Shropshire and Cheshire, unfolding before us a complete panorama of English life: rich rolling lands, quiet towns and villages, bustling industrial cities; and it was fascinating to us as Canadian farmers to note the different breeds of animals that were seen in the fields as we passed into the counties famous for them; they also marked the boundaries! Although it was January, men in many parts were working in the fields preparing the land for spring.

Liverpool was reached in the evening where we found our hotel one of the finest in Europe, with steam heat and running water in every bedroom. Here Mr. Weir explained the objects of our tour and presented each of us with a volume containing much information on markets and descriptions of most of the places we were to visit. The next morning, sharp at nine, in bright sunshine and a crisp air we were on our way to the extensive dock system of the Port of Liverpool, through which passes a third of the ocean-going traffic of the United Kingdom. The docks extend for 7 miles, and our visit was to the most recent addition, the Gladstone Docks, which were opened last year by His Majesty the King. The Gladstone Dock which forms part of it, the largest dry dock in Europe, can accommodate the biggest ocean liner.

We were shown through one of the three-storey warehouses of this dock whose combined warehouse provides 50 acres of storage space. Even the roofs accommodate goods in times of emergency and from one of them we obtained a view of the whole Gladstone Dock system. Hundreds of cranes, ships upon ships, and piles of merchandise gave us a vivid impression of the important part that Liverpool plays in the everyday commercial life of Great Britain. One vessel alone was unloading 8,000 carcasses of frozen Australian mutton, yet this was not to be considered a very small shipment. The previous ship from Australia had brought five times as much in addition to other cargo!

The docks of the Port of Liverpool are under the jurisdiction of the Mersey Docks and Harbour Board, and during our inspection of the Gladstone Docks, we were the guests of this organization.

The great tobacco warehouse was next visited, where we saw storage space for 70,000 hogsheads of tobacco, each valued at about \$2,500, the value of the tobacco in store at the time of our visit being more than one-third of the total value of Canada's wheat crop last year, and we noted with pleasure a large quantity of Canadian tobacco. Outside the building is an incinerator, known as the "King's pipe" where all condemned and spoiled tobacco is destroyed.

We were now taken to the Liverpool Corn Exchange where we saw a spot market and were able to examine the different kinds of grain that come to the British market from other countries. We also visited the main trading hall where British grain dealers gather for direct trading; and completely equipped laboratory for the grading of grain. Before leaving, we were addressed by R. G. Barker, the President of the Exchange, who in an informative talk told us that one-fifth of the wheat imported through the port of Liverpool was Canadian and one half of that was absorbed by the mills of the Liverpool area.

After lunch we paid a flying visit to the extensive cattle lairage at Birkenhead, across the river, where fat and store cattle are received, now mostly from Ireland, the supply of Canadian cattle being practically nil. On our return to Liverpool we had the novel and delightful experience of a reception by Liverpool's Lord Mayor, Miss Margaret Benson.

(To Be Continued.)

Dense Population

Belgium has the greatest population to the square mile of any European country. The ratio is 658. Great Britain has 391 inhabitants to the square mile. In Germany there are 248, and in France 187.

Her Color Went Black. She Was Frightened To Death

Mrs. Waite, New Brighton, writes: "That deadly indigestion and gastritis, caused by constipation made my color go black. I was frightened to death, and I feel your laxative saved my life. I take them every night now for precaution, and do not fear an attack of constipation poisoning any more."

NEWEST MOTOR VEHICLE

Motorized Baby Carriage Now Being Used In London

The modern world has become accustomed to the idea of motorized industries. Almost everything in the household is now operated by motors—sewing machines, washing machines, dish-washing machines, sweepers operated on the vacuum principle, electric cooling utensils of all kinds, from toasters to coffee percolators, electric foot-warmers, hair curlers and almost countless assortment of other things, all mechanical, operated either by steam or electricity.

But the motorization has affected even the toys of childhood. There are now electric kiddie cars. They were on exhibit recently at the British Industries Show in London. Tiny motor-cycles for children were shown. The wheel chair upon which vacationists at spas were propelled down the boardwalk by servants has now been replaced by gasoline engine wheel chairs operated almost like taxicabs.

The most interesting of the exhibits, however, was a line of motorized baby carriages. They ranged from flimsy baby carriages purchasable for about \$100 to the equivalent of Rolls-Royce baby carriages, costing a thousand dollars, and in some special models considerably more. The deluxe models are splendid specimens, in miniature, of the carriage-maker's art, with a single-wheel motor attachment in front. They are already in use, and it is not an uncommon sight in the London parks to see neatly uniformed nurse girls driving babies in the motorized carriages. The speed limit to the carriages is automatically limited to five miles an hour, and the average speed is three miles an hour.

Nurse girls are required to pass a test before they are given licenses to drive the motorized baby carriages. Special traffic regulations will undoubtedly have to be passed, governing the speed and right-of-way regulations as applied to such conveyances, and undoubtedly filling stations to supply petrol and oil for the "pramobiles" will make their appearance in the malls and parks to enter to the new type of vehicle.

Crow and Gopher Campaign

Manitoba Department Of Agriculture
Offers Prizes Totalling \$2,000

The Manitoba Department of Agriculture announces a campaign against crows and gophers in which prizes are offered for the persons sending in the greatest number of legs, eggs and tails to the Chief Game Commissioner. For each gopher tail one point will be reckoned, for each crow's egg two points and for each crow's leg four points. The first prize is \$100 and minor prizes will bring the whole amount to \$2,000.

Eggs must all be taken and gophers and crows all killed not later than September 1, 1928, and within the province of Manitoba.

He: We've knocked a man down.
Aren't you going to stop?
She: Oh, that's all right. We'll read about it in the papers.

NEW WHITE STAR LINER LAURENTIC

The new White Star liner "Laurentic," 19,000 tons, completed late in 1927, especially for the St. Lawrence route, which arrived in Montreal on May 8, on her maiden voyage to St. Lawrence ports. With the White Star liner "Albertic" she shares the honor of being the largest cable liner ever to come up the St. Lawrence to Montreal.

Canadian Game Animals For New Zealand

Pair Of Rocky Mountain Sheep and
Pair Of Beaver Shipped To
Auckland

One of the happy results of the wild life conservation policy carried out in our national parks by the Department of the Interior is that Canada is now in a position to assist conservationists of other lands. At various times in recent years donations of wild animals have been shipped to points in the United States and other countries.

Recently one pair of beaver and one pair of Rocky Mountain sheep were shipped from Vancouver to the city of Auckland, New Zealand. The beaver were taken in Jasper national park, while the sheep are from the rapidly increasing wild herd in Rocky Mountains National Park.

Every precaution was taken to see that the animals reached their destination in good condition, and on arrival at Auckland they were placed in the Zoological Gardens of that city.

Neat, Slender and Smart

An individual style at a moderate cost. Graceful lines are added by pressed plaits at either side of skirt. Tucks at shoulders are decorative. Deep V at front gives vertical line. Design No. 907 employs lovely soft silk crepe in geometric pattern with harmonizing plaid silk crepe contrasting. Crepe satin in reverse treatment, novelty woollens, georgette crepe, wool crepe and lightweight woollens are extremely fashionable. Pattern in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32 and 34 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material, with 5/8 yard of 27-inch contrasting. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

SUNDAY SCHOOL LESSON

MAY 27

THE WICKED HUSBANDMEN

Golden Text: "Jehovah knoweth the way of the righteous: But the way of the wicked shall perish."—Psalm 1.6.
Lesson: Mark 12:1-12; 13:1-37.
Devotional Reading: Psalm 1.

Explanations and Comments

The Parable Of the Wicked Husbandmen, verses 1-8. This is the parable which Jesus spoke to the Pharisees. A man planted a vineyard and provided it with all things necessary for the making of wine, protected it with a hedge and watch tower and dug a pit for the vinepress. He sent the question of the owner in Isaiah's "Song of the vineyard": "What could have been done more?" This Song was well known to the enemies of Jesus, and when Jesus began in this way they undoubtedly recalled it and its direct condemnation of the leaders of the people of Isaiah's time, and knew that Jesus was about to utter a condemnation of themselves.

Then the lord of the vineyard let it to husbandmen and went away. Possibly it may be necessary to explain to pupils that the husbandmen were the farmers. One pupil when asked the meaning of the word said they were the married men. When the season of fruits came round he sent one servant after another to collect what was due to him, but the husbandmen beat one, badly treated another, killed a third, in like manner they treated yet other servants whom he sent. "Which of the prophets did not your fathers persecute?" Stephen cried to the mob which soon stoned him; "and they killed them that showed before of the coming of the Righteous One." "Jesus treats the whole long series of violent rejections as the acts of the same husbandmen. The class or nation was one, as a stream is one, though all its particles are different, and the Pharisees and scribes were the living embodiment of the spirit which animated all the past."—Alexander MacLaren.

"The terrible nests of evil is that it ever tends to reproduce itself in aggravated forms. Think of the influence of habit; the searing of conscience, so that we become able to do things that we would have shrunk from at an earlier stage. Remember how impunity leads to greater sin. So here the first servant is merely sent away empty, the second is wounded, the third is killed. All evil is an inclined plane, a steady, downward progress."

Asking For Federal Grant

Manitoba Applying For \$300,000
Standing To Credit Of Province

Application will be made by the Manitoba government for \$300,000 which is approximately the sum that stands at the credit of the province in connection with the grants made by the Dominion government to the provinces nine years ago for technical education. Hon. R. A. Hoey, minister of education, Manitoba, has announced.

Because of the industrial depression that prevailed at the time the grant was first made Manitoba was not able to take full advantage of it, but conditions have changed now. Mr. Hoey added, and the need for technical instruction, with the industrial development occurring now, was more apparent than ever.

Organize Construction Department

Saskatchewan Wheat Pool Will
Supervise Building Of Elevators

A new Construction Department has recently been organized by Saskatchewan Wheat Pool Elevators Limited, which will supervise the construction and acquisition of the Pool elevators included in the 1928 building programme as well as the maintenance of the elevators at present existing in the system. The department comprises an engineer, two superintendents and eight foremen in charge of the various districts. Each superintendent is in charge of a division and each division has four districts with a repair foreman for each.

Dutch Immigration

Manitoba Deputy Minister Of Agriculture Going To Holland On Mission

J. H. Evans, deputy minister of agriculture in the Manitoba Government, is leaving for Holland at the invitation of a Dutch emigration organization which is investigating settlement conditions in Manitoba and Western Canada generally.

With L. A. Gibson, head of the dairy branch of the provincial department of agriculture, Mr. Evans will also represent Manitoba at the world's dairy congress to be held in London around the end of June.

If you are anxious to become a prominent citizen locate in a small town.

Better swallow your indignation when you thirst for revenge.

New Chemical Discovery

Furfural A Powerful Solvent Made From Oat Hulls

Sit down at the breakfast table, eat your porridge, glance at a magazine and look at your watch to see if you can walk to the S.S.

Do you realize that oats furnished the breakfast and helped make the watch and the magazine? asks the New York Herald-Tribune. Moreover, oats may have helped to make your motor car tires, to color your hose and to keep healthy a wounded tree. And that's only a part. What's the answer? Furfural, which is a product of oats and which was one of the hundreds of things tucked away in the booths of the recent chemical exposition that justified the slogan over the New York headquarters of the American Chemical Society: "Chemistry Creates New Competition."

Furfural has a picturesque story. It is a powerful and effective solvent, which can be made from many waste products of the farm. Corn cobs are an excellent source; but, unfortunately, corn cobs are scattered over many farms and the task of bringing them together in one place is expensive.

Oats are another problem. The makers of a brand of oatmeal used to have on their hands some tons of oat hulls every day, which were useful only for fuel, and not very good fuel at that. So the consulting chemist of the company decided that what could be done with corn cobs could be done with oat hulls; furfural in commercial quantities resulted.

That Stomach of Yours!

London, Ont.—"I was in a general rundown state of health. I had indigestion and my stomach was weak and so sore I could not bear to touch it. I got where I did not have any health at all, was not able to follow my usual line of work. I saw Dr. Pierce's Golden Medical Discovery recommended for stomach trouble so I decided to try it and it relieved me of my indigestion and weak stomach and built me up in health. I can highly recommend the 'Discovery' to anyone who suffers as I did. It is excellent!"—Francis Henry Cook, 471 Elizabeth St.

All dealers. Extra large bottles, liquid \$1.35; Tablets \$1.35 and 65¢.

Write Dr. Pierce's Invalids Hotel, Buffalo, N. Y., for free advice.

Trade With China

American tourist business in China is having a far-reaching effect upon the dairy industry of British Columbia. The American tourist has carried to the Orient his well known appetite for ice cream and to meet his demand, ice cream is being shipped to Shanghai from Vancouver. There is also growing Oriental demand for Canadian fruits, butter, beef and bacon.

Men who speak before they think have occasion to offer many apologies.

WAS VERY WEAK NERVOUS AND MELANCHOLY

Mrs. Geo. McKenzie, Campbellford, Ont., writes:—"A short time ago I was troubled very badly with my heart and nerves, the cause of it, I think, was my going through the change of life."

"I was very weak and melancholy, and so nervous I could hardly bear to hear a clock ticking, and I did not sleep well."

"I was advised to try

so I sent at once for a box; took them and got another, and before they were all gone I felt good, my nerves are fine, I do not mind any noise, and I can sleep well. I cannot recommend them too highly to those suffering as I did."

Price 50¢, a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Dominion To Be Invited To Participate In League To Outlaw War

Washington.—Secretary of State Frank B. Kellogg will invite Canada and the rest of the British self-governing Dominions within the next few days to participate in a league to outlaw war which the secretary is seeking to form. Mr. Kellogg so informed the Canadian Press following receipt of the British acceptance of his peace proposals.

The London government, through Sir Austen Chamberlain, secretary of state for foreign affairs, after emphasizing its commitments under the covenant of the League of Nations, assures Mr. Kellogg that if its interpretation of his proposals, and particularly of his speech interpreting his own proposals in New York recently, were correct, His Majesty's government finds nothing in its existing commitments which prevents their hearty co-operation in this new movement for strengthening the foundations of peace.

The last paragraph in Great Britain's note, however, stresses the fact that London speaks only for the British government.

"It will, however, be appreciated that the proposed treaty from its very nature, is not one which concerns His Majesty's government in Great Britain alone, but is one which they could not undertake to participate in otherwise than jointly and simultaneously in the Dominions and the government of India.

"They have been in communication with those governments and I am happy to be able to inform your excellency that as a result of the communications which have passed, it has been ascertained that they are all in cordial agreement with the general principles of the proposed treaty.

"I feel confident therefore that on receipt of the invitation to participate in the conclusion of such a treaty, they, no less than His Majesty's government in Great Britain, will be prepared to accept the invitation."

Mr. Kellogg states that he will immediately send an invitation to all the British self-governing Dominions and India to sign separately the pact to outlaw war as an instrument of national policy.

Radium Exempted From Duty

Action Of British Treasury Will Greatly Relieve Hospitals

London.—The British treasury has decided to exempt all radium compounds from customs duty. The concession will greatly relieve hospitals who are experiencing serious difficulties in obtaining supplies owing to the enormous cost. The government in January, last year, imposed a duty of 23 1-3 per cent. on all radium.

Explorer Reported Safe

Berlin, Germany.—Reports received here from Loh, Northern India, says the German explorer, Wilhelm Filchner, the British missionary, Mat Wilson, and the American missionary, Playmire, arrived safely there. Filchner, in 1920, had been reported murdered together with several members of his Tibetan expedition.

Railway Manager Arrested

Warsaw, Poland.—Police arrested Stanislas Turek, assistant manager of the railway administration, and three other men, charged with selling secret plans for Polish railway mobilization in case of war to Moscow. The men also are accused of betraying secrets of Polish airplane manufacture.

Application Is Made For Upward Revision Of Tariff On Sugar

Ottawa.—For the second time the application of the Dominion Sugar Company, of Chatham, Ont., for upward revision of the tariff on refined sugar was before the tariff advisory board.

The application is being heard in conjunction with a request from W. M. Thrasher, Saskatoon, for downward revision of the tariff on sugar. Mr. Thrasher also asks for the abolition of the Dutch standard.

On behalf of the Dominion Sugar Company, A. V. McIntyre stated there was a loss of 7 per cent.

Chairman W. H. Moore questioned A. W. Stewart, of the St. Lawrence Sugar Refining Company, supporting

Peking Is Claimed

Japanese Memorandum Causes Great Anxiety In China

Peking.—The Japanese memorandum handed the warring Chinese generals, which in effect declares the neutrality of Manchuria under Japanese military protection, overshadows all other phases of the confused Chinese situation.

Even the anxiety of Peking and Tientsin over the approaching tide of civil war, the business-like preparations to protect their nationals by foreign military commanders, and the position of Japan in Shantung have been virtually forgotten while official circles, foreign and Chinese alike, discuss the implications of the memorandum.

It is agreed that these are momentous, probably more significant than any far eastern development since the Great War.

Among the high Chinese there is a feeling approaching consternation and the fear is expressed that Japan is taking advantage of war-torn China to establish permanently her domination of Manchuria and to demand recognition of it.

Staff Is Kept Busy

Requests For Returns By House Members Are Numerous

Ottawa.—Returns requested by members of the House of Commons are so numerous and voluminous that some of the Government's departments are having difficulty in keeping pace with the demand.

This was stated in the House of Commons by Hon. J. A. Robb, Minister of Finance. Mr. Robb informed the members that Government departments stated that the requests from the House were adding materially to their work. Some of them declared that they must either have more time to get out the returns or more help to do the work.

Mr. Robb made this statement in explaining why it took some time to furnish certain returns requested by members.

No Opposition From Britain

But Chinese Troops Must Not Enter Legation At Peking

London.—The British government has no intention to offer any opposition to the advance of the Chinese Nationalist armies on Peking. Godfrey Locker-Lampson, under secretary for foreign affairs told the House of Commons.

Mr. Locker-Lampson said the Government's only care was to see that these troops did not enter the legation quarters.

Amendment Deleted

Ottawa.—The Senate deleted the amendment to the act respecting inter-provincial and international traffic in intoxicating liquors, which permitted the transportation from one province to another of a half gallon or less. Senator Dandurand led protests from nearly all the provinces against the amendment.

Sending Plane To States

Oso.—The plane in which Captain George H. Wilkins and Carl B. Nielson flew from Alaska to Spitzbergen, has left Tromsø aboard a ship for Bergen. It will eventually be sent to America on a Norwegian liner.

Premier May Go To Geneva

Suggestion Made That Premier King Attend Next Session Of League Of Nations

Ottawa.—The suggestion that Premier Mackenzie King attend the next assembly of the League of Nations, has been endorsed by the central executive of the society in Canada.

The resolution, moved by Senator Belcourt, was as follows:

"That the suggestion by Sir Herbert Ames to the effect that it was most desirable that the Prime Minister, Right Hon. W. L. Mackenzie King, attend the next assembly of the League at Geneva, and sit at the council meeting as Canada's representative, has the cordial endorsement of the society, and that the general secretary be instructed to send a copy of this resolution to the Prime Minister, and to express the hope that he may find it possible to act in accordance with it."

Amendment Defeated

Anti-Dumping Move Lost By Large Majority In House

Ottawa.—A Conservative anti-dumping amendment to supply was defeated in the House by a vote of 110 to 59. The amendment was moved by R. K. Anderson (Conservative, Halifax), and was that the government should take necessary action effectively to control the importation into Canada of natural products of a class or kind produced in Canada, under conditions that operate to the detriment of the Canadian producers.

A. W. Neill (Independent, Comox-Alberni), voted with the Conservatives, while the Progressives and U.F.A. voted with the government.

Farm Workers Scarce

Demand In Northern Alberta Exceeds Supply Is Report

Winnipeg.—The influx of immigrants this season has been well covered, and in northern Alberta there is scarcely enough farm help to meet the demands, according to J. S. McGowan, western manager of the colonization department of the Canadian National railways who returned here from a tour of the west.

He estimated that well over a million acres of new land will be cleared and brought under the plow this year in northern Alberta and northern Saskatchewan.

New immigrants, he said, were being used extensively in this work.

Discusses Antarctic Plans

Wilkins Hopes To Locate Suitable Base For Meteorological Station

Tromsø, Norway.—Captain George H. Wilkins, commenting on Spitzbergen's place in the future of Arctic airways, said: "It likely will be the half-way house between Chicago and China."

Wilkins said, in discussing his plans for an Antarctic flight, that he hoped to make an aerial camera survey of the coasts of the Ross Sea to Graham's Land, for the purpose of locating a suitable base for a meteorological station. Such a station would be of great importance in forecasting the weather for Australia, South America and Southern California.

Formed Permanent Organization

Dr. C. M. Hincks, medical director of the Canadian National Committee for Mental Hygiene, was elected president of the Canadian conference on social work held in Montreal, due to the success of this first conference a permanent organization was formed with Dr. Hincks at its head.

Ask Higher Tariff On Dairy Products

Findings Of U.S. Commission Not Yet Submitted To President

Washington.—The tariff commission's recommendation on milk and cream duties has not yet been sent to the president. The Canadian Press learned two weeks ago that the findings of the commission which recently investigated the cost of production in Canadian dairies, were ready for the White House, and it was understood that an increase in the duties would be recommended.

The farmers' co-operatives, who claim to represent 981,000 farmers in this country, asked for upward revision of the tariff on practically all products of the farm, except grain on which they already have a prohibitive tariff. In most cases they ask, in their resolution addressed to Congress, about 100 per cent. increase in the existing duties.

Willingdon Opens Institute For Blind

New Building Provides Treatment For Sights In West

Winnipeg.—The opening of the new building of the Canadian National Institute for the Blind at Winnipeg, will be the means of not only comforting and supporting hundreds of those now afflicted, but of saving the sight of at least half of those in Saskatchewan and Manitoba whose vision would otherwise be doomed.

This was the repeated statement of successive speakers representative of the institute when His Excellency Viscount Willingdon, governor-general of Canada, officially declared the new building open.

Two Injured In Plane Crash

Agyar, Burma.—Captain George Fellellet d'Oisy, flying from Paris to Tokyo, crashed when landing here. He was not injured, but two mechanics were. The plane was badly damaged.

TWO IS COMPANY

Rolf Hansen and Anna Auguzen, of Oslo, immigrants, were married in the Canadian National Railways Colonization Offices by Rev. T. J. Langley, of the Norwegian Lutheran Church, on their arrival in Winnipeg. They desired to face their new life in Canada as man and wife rather than to separate. They will go on a furra near Birch Hills, Sask.

Heavy Appropriations Made For Administration Of Canada Grain Act

Problem For Soviets

Thousands Of Russian Peasants Making Vodka Illegally

Moscow.—Illicit distilling in Soviet Russia by the peasantry, who are anxious to prevent the Soviets from capturing their stocks of grain, is on the increase.

In an interview with the chief of the Soviet police the Izvestia learns that even the police are powerless to stop this evil, since many members of the local Soviets are themselves illicit distillers. In many places the police sympathize with the peasants and give them due warning of proposed raids.

The commissariat for internal affairs has adopted the most "repressive" measures against the peasants, but finds that other departments are "extremely passive" and are not helping in the campaign. Trade union officials in particular are being accused of indifference and in many cases of actively assisting the bootleggers.

As to the extent of the illicit activities, the Izvestia states that in one month, even under the half-hearted measures adopted, no fewer than 67,170 peasants have been arrested. Many of them have been fined, the total of the fines amounting to more than 1,100,000. The police have confiscated 22,588 apparatus and nearly 2,000,000 litres of illicit vodka.

Discuss Exchange Of Lines

Co-operation Between Phone and Telegraph Service Possible In Alberta

Edmonton.—Ways and means for working out an exchange of facilities between the government telephone system and the telegraph companies are at present under consideration and a conference in connection with the matter was held between W. D. Robb, vice-president of the Canadian National Railways, and R. B. Baxter, Deputy Minister of Telephones.

Mr. Robb is referring the question as thus opened to the head office of the Canadian National Railway Telegraphs and it is likely that a working agreement will result.

Under the proposal plan the wires of the provincial telephone system will be made use of by the telegraph company in certain parts of the province for the transmission of telegraphic messages, while the province will use telegraph pole lines for stringing its wires in other places by way of exchange. A similar arrangement in some parts of the province is already in operation between the province and the Canadian Pacific Railway telegraphs.

Acquire More B.C. Land

Sardis, B.C.—The John I. Haas Hop Company, of San Francisco, that now has 100 acres of land in hops at Sardis, B.C., recently acquired additional 80 acres just south of its present holdings, which will be trebled during the coming season. There were approximately 750 tons of hops grown in British Columbia last year, practically all of which have been shipped.

Controversy Raging In Great Britain Over Prayer Book Measure

London.—Debate on the new revised prayer book probably will not begin in the House of Commons before the end of June, but controversy over the changes is raging.

The prayer book measure passed the first preliminary when the ecclesiastical committee of both houses voted 20 to 3 to allow it to proceed. The legislative committee must now approve it before it is submitted to the House.

The principal contenders in the controversy, so far, are Sir William Joynson-Hicks, Home Secretary, who opposes the revision, and the Right Rev. Arthur Foley Winnington-Ingram, bishop of London, who supports it.

The bishop precipitated the argument by circulating London Members of Parliament, urging them to support the measure. The Home Secretary announced that passage of

Ottawa.—Appropriations of \$1,860,555 for administration of the Canada grain act and \$377,590 for management, operation and maintenance of elevators, passed the committee of supply in the House of Commons when estimates of the department of trade and commerce came up for consideration.

Other smaller items were also approved. The total appropriation for this department is \$4,690,931, or \$310,551 less than for the last fiscal year.

In answer to a question Hon. James Macleod, minister of Trade and Commerce, informed the committee that he understood provision was made for the establishment of a grain inspection point at Moose Jaw.

Considerable discussion arose as to the necessity for this inspection point. J. G. Ross, Liberal, Moose Jaw, supported the estimate of this new inspection point strongly.

There was discussion by western members as to the advisability of compulsory inspection.

Dr. A. M. Young, Liberal, Saskatoon, read a resolution urging the establishment of an inspection point at Saskatoon. He himself was strongly in favor of this.

Opposition to the suggestion was voiced by another Saskatchewan member, John Evans (Progressive, Rosetown).

Mr. Evans contended that no need existed for inspection points either at Moose Jaw or Saskatoon, and expressed doubt as to whether the letter read by Dr. Young represented the opinion of the Saskatchewan farmers.

Further discussion was continued by G. G. Coote (U.F.A., MacLeod), and D. F. Kellner (U.F.A., Athabasca), both of whom were opposed to the establishment of these inspection points.

The minister of trade and commerce at one time rose and protested that the discussion was out of order, inasmuch as this particular item was not concerned with inspection points at Moose Jaw or Saskatoon.

Salary Increase For Judges Recommended

House Will Have To Approve Report Of Committee

Ottawa.—An increase in salary to Canadian judges has been approved by the special parliamentary committee. The committee's report will, it is stated, recommend an increase of \$2,000 to county court judges; the same amount to provincial court judges, and \$3,000 increase for judges of the supreme court of Canada.

The committee held its sessions in camera. It is understood that the report was only adopted on the casting vote of the chairman.

The committee's recommendation will have to receive the approval of the House.

An increase in salary of \$2,000 per annum is also recommended for judges of the exchequer court of Canada.

The conclusion reached by the committee was that the remuneration paid to judges in Canada was inadequate and should be increased.

Canada's Basic Industry Sound

Agriculture In Canada Prosperous According To Dominion Statistics

Agriculture is Canada's basic industry, and agriculture is prosperous. According to the Dominion Bureau of Statistics, the Dominion's gross agricultural revenue was \$1,389,394,000 in 1922 and \$1,736,129,000 in 1927.

This represents an increase of approximately 25 per cent. in five years, and the percentage of increase in the gross agricultural wealth of the country for the same period is only slightly less. The figures are: \$6,743,685,000 for 1922, and \$7,963,169,000 for 1927.

For all Canada, occupied farm lands increased in value to the extent of \$1 an acre in 1927 as compared with 1926 and last year stood at \$38 according to the bureau.

Farm lands in British Columbia last year had an average value of \$80 an acre, an increase over 1926 of \$9 and a figure far beyond that of any other province. Much of British Columbia's arable land is found in fertile valleys where it is cultivated extensively for fruit growing or market gardening. Saskatchewan, the greatest grain province, had an average of \$26, with an increase in the year of \$1. Ontario increased its average from \$62 to \$65, and Quebec from \$53 to \$57.

The increased value and number of livestock is another evidence of prosperity. Canadian horses, cattle, sheep, swine and poultry in 1926 were valued at \$747,509,000; in 1927 the figure had gone to \$862,097,000, most of the increase being in cattle.

There are no figures in existence to show the extent of farm indebtedness in the Dominion, but apparently in most cases mortgages are being carried without embarrassment. A few years ago there were sections in Western Canada where farms freely were being abandoned to the mortgage companies. Today, after a succession of profitable crops and in a healthier atmosphere of optimism, this condition no longer exists. It is interesting to note that according to the latest census 8.7 per cent. of all Canadian farms were occupied by their owners, showing the numerical insignificance of the tenant class.

Color Matter Of Preference

Brown Shelled Eggs Laid By Common Hens, White By Others

Color of the shells does not affect the food value of eggs. This statement from the poultry department of the University of Wisconsin College of Agriculture may be accepted with certain reservations by housewives who have always insisted on "white eggs" or "brown eggs." Color is entirely a matter of local preference, say the Badger poultry specialists, and as a result eggs of the color most commonly requested on any market are considered by the buyers in that community to be of superior quality.

Brown-shelled eggs are indistinctly common breeds, as Barred Rocks, Rhode Island Reds and Wyandottes, while white-shelled eggs are produced by Leghorns, Minorcas and other Mediterranean breeds.

A Good Insurance Risk

Although he carries a blanket public liability insurance policy for \$100,000 on any air craft he may be flying, Col. Charles A. Lindbergh has not presented a single claim for damages in the thousands of miles he has flown since he piloted the Spirit of St. Louis from New York to Paris. This has been announced by the insurance company.

Raise Largest Potato Crop

Prisons of Manitoba and Saskatchewan raise two-thirds of the potato crops reported by penal institutions of the Dominion. Nearly a third of a million pounds of potatoes are dug up every year at Stony Mountain, and nearly as many figure in the yield at Prince Albert.

"I saw a dog with five legs the other day."
"Where was the fifth leg?"
"In its mouth!"—Vikings, Oslo.

W. N. U. 1734

KEEPING CREAM COOL

Putting Cream In Can and Placing In Iced Water

With the arrival of warm weather cream producers who patronize a butter factory are faced with the problem of keeping the cream sweet and clean in flavor until delivery is made. Authorities of the Dairy and Cold Storage Branch, Department of Agriculture, Ottawa, express the view in pamphlet No. 37, entitled "Care of Cream For Buttermaking," that the easiest and best way is to put the cream in an ordinary shotgun can and place it in a tank of lead water immediately after skimming. This pamphlet shows an illustration of a suitable tank capable of holding four cans and sufficient ice and water to keep the cream at a low temperature. The tank is made with a space of four inches on all sides and on the bottom which is filled with plating-mill shavings. The cover is also insulated in a similar manner. The tank is lined with galvanized iron.

This tank, although regarded as a little expensive, is highly recommended on farms where the ice has to be conserved. An ordinary wooden tank makes a fair substitute. Whether tank is of insulated type or plain wood covers are of great importance, as they help to keep down the temperature of the water and cream.

This pamphlet, which can be obtained from the Publications Branch, Department of Agriculture, Ottawa, gives the results of an experiment which shows the great advantage of keeping cream in a proper tank over the usual practice of holding it in the cellar. In the tank cream held for sixty hours at an average temperature of 54 degrees Fahrenheit, developed an acidity of only 0.165 per cent. When kept in a cellar for the same period the average temperature of the cream was 63.7, which allowed the acidity to reach 0.505 per cent. That is to say, cream held in the cellar had three times as much acid as that cooled in the lead water.

Western Alberta Minerals

American Interests To Develop Immense Lead and Zinc Deposits

Some initial work is to be done this summer on the development of an immense lead and zinc deposit in the north country just above the Alberta boundary. Mineral rights in this area are held by a syndicate controlled, it is understood, by Boston interests, and the work proposed for the coming season will consist of sinking experimental shafts with a view to determining definitely the extent and character of the deposit.

A working crew will go north for this purpose soon after navigation opens. The area to be thus developed is in the Great Slave Lake country about eight miles beyond the Alberta limits. It was prospected before the war and rights acquired from the original prospector by an English concern. Owing to wartime conditions, however, no development work was done, and the English holders dropped the claim.

It is said that competent geologists have declared the area to hold the richest body of lead and zinc ore on the continent. Merely as a surface proposition, there is believed to be millions of tons of ore in the deposit and if the tests now about to be made show the deposits to have the expected depth there will be an almost fabulous quantity of the two minerals out of which to make a new Eldorado of the north.

Already there are visions of great transportation activity on the northern waterways if the development of the lead and zinc deposit of the top country is proceeded with. Freight will necessarily go in and come out by way of the Mackenzie route, connecting with McMurray and the waterways rail line. Incidentally, lead and zinc may force an ultimate extension of the railway into the north, instead of oil.

Just a Report

A Negro preacher had pestered his bishop so much with appeals for help that the bishop finally told him with a tone of finality that he didn't want any more appeals from him.

The next week came another letter from the preacher:

"Dear Bishop, I assure you this is not an appeal. It is a report. I have no points."

Important To Beekeepers

The artificial mating of queen bees by which the beekeeper in future can make sure that excellent strains of bees can be perpetuated throughout generations, with a resultant high grade of honey, was revealed by G. H. Galt, at the annual convention of the Manitoba Beekeepers' Association recently. The new discovery, he declared placed the industry on a controllable basis.

JOHN O'BRIEN.

The popular hotel manager of the Canadian National Railways, who will again be in charge of Jasper Park Lodge, Jasper National Park, Alberta. He has been manager of this Rocky Mountain summer resort since 1925.

Will Move More Buffaloes

Wainwright Herd Has Been Increasing Rapidly

It is expected that some 1,100 head of buffaloes, mostly year-olds, will be shipped from the Wainwright Park early in June to the range in the far northern part of Alberta, where, during the past three years several thousand head have been transferred. The former monarchs of the plains have increased so rapidly in their sanctuary at Wainwright that their numbers have far exceeded the carrying capacity of the pasture in the park. Reports from the vicinity of Fort Smith, on the northern boundary of Alberta, indicate that the animals which have been moved are thriving in their new home.

Assist Agricultural Colleges

In England and Wales there are seventeen institutions receiving grants from the ministry of agriculture. Six of the leading universities are granted money, though in no case does it exceed \$35,000. There are five colleges classed as agricultural, one as horticultural, a dairy institute, and a veterinary college. Altogether, the grants amount to \$225,000.

Hop Growing In B.C.

The John I. Haas Hop Company, of San Francisco, that now has 100 acres of land in hops at Sardis, B.C., recently acquired additional 50 acres just south of its present holdings, which will be trellised during the coming season. There were approximately 750 tons of hops grown in British Columbia last year, practically all of which have been shipped.

London Has Repair Shop For Lifeboats

Those Put Out Of Commission Around Coast Are Immediately Replaced

In an out-of-the-way corner of the River Thames in the port of London is a lifeboat hospital. The doctors are all old sailors, most of whom have long been connected with the lifeboat service.

The hospital is the repair and store depot of the Royal National Lifeboat Institution. One enters, from the street through a small door, just as though going into an ordinary house, but once inside the similarity ceases, writes W. I. Seymour, in Pearson's Weekly. There are busy yards, machine shops, and store rooms where they keep a stock of everything necessary, from spare lifeboats down to metal polish.

Eight or nine lifeboats fully equipped, are always kept "standing by" ready to be rushed off to replace any that may be put out of action around the coast. Day and night someone is always on duty, prepared to summon all hands to dispatch a lifeboat immediately on receipt of an S.O.S. No station must be kept waiting.

Menhine the damaged lifeboat is being returned to the yard, and on arrival she is immediately overhauled, put into a thorough state of repair, re-equipped, and then put on stock, ready to take her turn again. No new boats are ever kept in stock—they go direct from the builders to the station for which they are intended.

Plant Has Peculiar Seed

Goat's-Beard Equipped With Parachute Which Expands and Contracts

Goat's-Beard, a European plant has a seed that could almost be said to walk. It is equipped with a kind of downy, ribbed parasol, or parachute, by which it drifts far in distance through the air, and by the action of which it is able to move along the ground after it lights. The effect of alternate sunshine and dew on the parachute is to make it expand and contract, so that unless the seed has landed on soil, where it can take hold, the ribs will drag it along day after day until a favorable spot is found.

New Homesteads In West

Over a thousand new homesteads were filed in the four western provinces during the months of January and February this year, being 1,036, as compared with 629 for the same two months' period last year. By provinces, Manitoba reports 74 homestead entries as against 71 last year. Saskatchewan 430 as against 333, Alberta 582 as against 213, and British Columbia 30 against 9.

Romance on C.P.R. Route

The Canadian spring had early influence upon Andrea Hansen, 21, and Neils Christian Nielsen, 23, handsome young Danish immigrant couple who, on arriving at Winnipeg, decided to marry and, with the assistance of the Canadian Pacific Railway Colonization Department officials, did so forthwith.

They had known each other in their homeland, Denmark, for many years, and had even been sweethearts, but on departing for Canada they had harbored no romantic ideas of thoughts of marriage. Travelling as strangers in a strange land, they met and found happiness in each other's company during the journey, and furthermore discovered their destinations to be close together. On reaching Winnipeg on their westbound trip, they decided to marry, and the C.P.R. Colonization department officials did the rest.

Rev. N. Damstov, immigration chaplain, aided the groom in securing a special marriage license. His son Victor, a member of the colonization staff, hurriedly procured a fine bouquet from the florists as a gift to

the bride from the company. An office adjacent to the Winnipeg immigration hall was cleared and prepared for the occasion. C. A. Van Scoy, head of the colonization department of the railway for Western Canada, volunteered to act as groomsmen, and R. G. McNeillie, general passenger agent, to give the bride away; a group of twenty immigration and company officials gathered, and the storge was set for the ceremony, the first among newcomers for this season.

"Vil du have Andrea for din ekte hustru?" asked Rev. N. Damstov.

"Ja!" responded Nielsen. The chaplain pronounced a special prayer of their guidance as strangers in the new land, charged them to continue faithful to one another, repeated the Lord's prayer, gave the benediction, made the sign of the cross, and Andrea and Neils Christian were declared man and wife.

They continued their journey westward that afternoon, two out of four hundred settlers.—Danes, Dutch, and English,—who were travelling at that time with the Canadian Pacific.

NEW POPULAR BEVERAGE

Four Thousand Gallons Of Tomato Juice Consumed Annually At Health Resort

Tomato juice is a popular beverage at French Lick Springs, a well-known health resort, says The Modern Hospital. According to the manager, R. J. Tompkins, the guests consume over four thousand gallons of specially prepared tomato juice each year. In commenting on this, Mr. Tompkins says:

"In late years physicians and dietitians have demonstrated that the juice of the tomato contains many beneficial elements, the chief of which are the three vitamins, A, B and C, and the recently discovered vitamin E, which assists the red blood cells in absorbing iron from the blood. These are necessary for nourishing and strengthening the entire human organism."

"Tomato juice may be served plain or with a pungent seasoning. In it," says The Modern Hospital. "One method of preparing it is to pour the juice out of the can and press the pulp through a sieve. Chill and season with salt and pepper. Add lemon juice, tabasco, or Worcestershire sauce, if desired or any other seasoning."

"The use of canned tomato juice has been growing ever since the discovery that the canning process acts as a preservative of vitamin C, which not only prevents scurvy but is necessary for growth and good health. Much of this conservation is due to the acid content of the tomato itself. In addition to vitamin C, tomatoes rank with lettuce and green string beans as a source of vitamins A and B."

"Increasing popularity of the tomato as a source of vitamins is due to the fact that it can be obtained all the year around at a comparatively stable price, and because the labor of preparing it for use is smaller than for almost any other source of the vitamins, a matter of importance in the hospital or health resort."

Will Not Incur Large Debt

But Highway Building In Saskatchewan Will Be Speeded Up

"No one had ever criticized the highway map of the Province and the type of earth road is as good as any built anywhere, and they are well designed," says Hon. Geo. Speace, the Saskatchewan Minister of Highways, Labor and Industry goes on to point out the economical aspect of highway building and gravelling, which is being commenced this summer. "The Province is in a splendid financial position today. We are going to speed up but will not go head over ears in debt. Colonization is needed, but colonization is a human problem. You can't dump people into the country and not take care of them. Provincial highways had been built to serve points in the East, West, North and South, but no government can build more highways than the people can pay for. They must be built where they will give the greatest service."

"Air survey will be proceeded with this summer; the Dominion government will do this," he said. "They have the equipment but the provincial government will be able to give the information to the people. Tourist traffic by lake and river will be made a study, but until the fullest information is obtained no charts can be made. It would not be safe. The work of constructing the road into the new park in the North is under way. It will be completed in time for the opening of the park in August, and in July will begin the work of removing the loose boulders from the river and Montreal Lake. When this is done it will open up a fine waterway route in the tourist district."

No Argument

A new 5 and 10-cent store had been opened by a man named Cohen. A woman came in one day and selected a toy for which she handed the proprietor a dime.

"Excuse, lady," said Cohen, "but these toys are 15 cents."

"But I thought this was a 5 and 10-cent store," protested the customer.

"Well, I leave it to you," came the reply; "how much it is, 5 and 10 cents."

Infatuated Youth: "Thinking of me, darling?"

Weary Girl: "Oh, was I laughing? I'm so sorry."

If a man is smart he can catch on and if he is wise he knows when to let go.

The youthful graduate is the only person who knows enough to run the nation successfully.

A sky dotted with small white clouds is sometimes called a mackerel sky.

Crop Planning Of The Farm

Keeping a Record Of What Crops Are Grown In Rotation

In order to keep a record of what crops have been grown each year on all the fields of various parts of the farm, it is desirable to draw each year a small plan of the farm. On this plan may be written the crops which have been obtained. If desired, such additional information may be recorded as dates of ploughing, seeding and harvesting. When this plan is made every year, it facilitates the following without error of any rotation which may be desired. It enables one to learn what fields produce the largest yields of certain crops, providing information to enable the improvement of the rotation along the line of adapting certain crops to soils to which they are suited. Observations may be recorded regarding the presence of weeds in various parts of the farm, where soil drifting has occurred, where manure has been applied and any other points of interest. Above all, such a plan provides a definite record of the results of each year's work on the land and over a period of years is very instructive. Farming is a long-time business and records are necessary if much improvement is likely to be made.

Such a plan may be drawn in a book so that many years' records will be kept easily available. It is possible to use a few pages in the book to make a record of all cash receipts and expenditures and to record once a year an inventory of the value of all the equipment, livestock, and crops on the farm. These records, together with the cropping plan of the farm, give accurate information of each year's progress on the farm and are the best means of studying how to improve the farm business. No commercial enterprise would consider the conduct of its business without yearly records and neither should any farm enterprise. This method of keeping farm records is perhaps the most simple of any system but it gives, undoubtedly, the most fundamental information, and it has the great advantage of being extremely simple and easy to do. If a more elaborate system of accounting is desired, it may be adopted later. This advice is offered in Bulletin No. 98, entitled "Crop Rotations and Farm Management For the Prairie Provinces," available at the Publications Branch, Department of Agriculture, Ottawa.

The planning of the farm may be made a very enjoyable and instructive task for one of the boys or girls. They are given sufficient instruction in school in mapping to be able to apply this to their own farms.

To Preserve Wood

New Tool Invented For Injection Of Paste Treatment

The practice of giving logs a "hypodermic injection" to preserve them, invented in Germany not long ago, has spread to Britain, and a new tool has been invented to do the work. The new scientific method is being used to inject into telegraph poles a spreading paste that is said to keep fungi at bay. Many years are said to be added to the pole's life.

This treatment of wood is a step that may lead eventually to complete arrest of decay. If that ideal is accomplished, buildings of wood can be erected that will be as imperishable as structures of stone, brick or steel, while the cost will be much less. The effect will be that of transmuting wood into rock.

Aviation In Western Canada

The developing "air mindedness" in Western Canada was recently illustrated when three passengers arrived at Moose Jaw from Winnipeg by special Western Canada Airways plane for the transaction of business, this being the first business visit ever made by air to Moose Jaw. The plane later flew to Regina and then back to Winnipeg.

A good many things come to the man who is so busy that he has no time to wait.

"Mr. Landlord, I would like to marry one of your daughters."
Landlord: "Light or dark?"—Las-tige Kolner Zeitung, Cologne.

COOL AND FRAGRANT

Save the Valuable
"POKER HANDS"

PAINTED FIRES

BY NELLIE L. McCLUNG

Copyright, Canada, 1925

CHAPTER XXIV—Continued.

Then he exalted war and military life. It developed the best in a man, and at this the Major beat his breast, directing his audience to that storehouse of accumulated virtues. Then he appealed to the young men to "get into the game." He painted the glory of it, the freedom of it; the army was the place where a man was a man. The nation's hero was the warrior mollycoddles have to place in the world, especially with women. There was truth in the old song yet:

"If a lass would marry
He must learn a gun to carry."

Then in a lighter vein the gallant Major hinted at the charm of the French girls and how they admired the Canadians. His manner indicated that but for the presence of the ladies he could tell more.

While he was speaking, Pte. Crowe's hands were never still, nor did his lips cease from trembling.

The Major then called for recruits.

A Reliable Antiseptic.

Make sure no infection of cuts and wounds takes place, by applying Minard's Liniment.

HERCULES

PERMANENT BUILDING PAPER

MR. THINKER—

here's your health

Most of your clients are thinkers. A few facts regarding Hercules will impress them. Hercules—in three grades, x, xx, xxx—is tested and proven wind proof and damp proof. A little thought will show them that this is all a building paper should be.

And above all, by these very qualities, Hercules becomes the protection of the most precious treasures of the occupants of any home—their health.

A sample of Hercules is yours for the asking.

Appleford Paper Products

HAMILTON, CANADA

Major was a prince of story-tellers. "Say, boys, did you hear this one? One of the boys who had been on leave . . . "Roars of laughter followed, then more beer. "Too much hard liquor is bad," laughed the Major, "but too much beer is just right. No danger of being pinched for being noisy—we have both the proprietor and the policeman. Now, listen to this. There was a French girl . . . "

At one o'clock the party broke up. The Major had secured six names. He decided the next morning to let Private Crowe go back to the City. The kid was all right, but he lacked "pep." This was a job for a real man, and after all, the best little recruiter apart from himself, if it ever could be considered from himself, was the amber-colored bottle. It gave just the proper warmth and glow.

Jack made his journey around by Edmonton to Eagle Mines, arriving there on the first day of February. There had been no reply to his whine. He stepped off the train with a strangely beating heart. Helmi would be there, surely, but the platform was almost bare. Not a person whom he knew did he see as he hurried across the street and over to his own house.

The door was not locked, and he went in. A strange scene met his eyes—dirty dishes on the table, the remains of a slovenly meal; ashes from cigars on the plates; the bed showing that it had been slept in; the coffee pot was on the stove. The floor had been tramped by muddy feet and spat upon by tobacco chewers, and a forgotten pipe was on the window-sill. The air was heavy with tobacco smoke and the stale fumes of beer.

Jack's heart was heavy with apprehension. He went up to the left by the ladder on the wall. The bed there had been used too, and a man's coat was thrown across it. There it was—the house he had built—defaced, defiled. What did it mean? He would know what it meant, he would go over to the boarding-house.

Mrs. McMann, a few minutes later, related the interview to her friend Mrs. Turner. "He bounded in at me," she said, "just when I was putting the potatoes on to boil. 'Where's Helmi?' he almost shouted at me, without even bidding me the time of day. How could I tell him where Helmi was? 'She's not here,' I said, 'and I don't know where she is—she's been gone over a month,' I says. 'Where did she go?' he said. 'To Edmonton,' I said.

"Why did she go?" he stormed! Didn't she know I was coming back? 'Where did she say she was going?' 'Well, Helmi never confided in me, as you know,' I said.

"Land! I couldn't tell him why she went. I never was one that could talk about those things. I don't believe any of my people could. The Weekes were funny that way.

"Where's Sin?" he said at last, staring at me as if he didn't see me. "Sin had an accident in the mine, and went out the last train." "Well, look here, Mrs. McMann, who has been stayin' in my house," he says, "can you tell me that?"

"I knew very well a party of hunters had spent the night there—swells from town out deer shootin'—drunk as fools, too—I wouldn't let them in."

"I certainly have no knowledge of what's been goin' on in your house since you've gone," I said, very stiff. Mr. McMann always said there was no one could be stiffer than I could when I wanted to be. "Do you know of anyone having stayed there?" he said. "Yes," I says, "the crazy Englishman from English Creek was there for a week, about six weeks ago."

"Land, I thought he was goin' to strike me but none of the Weekes was ever cowards, so I just glared back at him stiff as pork. I could give him eye for eye, let me tell you. He went out at that and over the office. I think maybe he expected a letter from Helmi, but if she's written to him it's more than she's done for any of us. Gone over a month and not a word from her. And I was fond to that girl, though I ain't the one to tell what I've done for anyone. Now, if Jack Doran had come in a better spirit he might have heard more from me. I'm funny that way, anyone can lead me, but strong horses can't drive me."

Jack Doran went to the postoffice. His voice sounded queer to him, and his tongue felt like a piece of rope. "Are there any letters for me, Mr. Armstrong?" he asked, hoping his voice was not beating like his heart. "Two have just come for Mrs. Doran," said the postmaster, handing them to him. "Glad to see you back to us again, Jack. People come and go at Eagle Mines—come and go—it makes it hard for a postmaster."

Jack went back to his own house—he must get under cover—the eyes of the people he met hurt him—they bored into him, twisting, turning, screwing, gouging, red-hot and sharp as ice. He must get somewhere where he could shut the door.

Experience of more than thirty years proves that aluminum is the only completely satisfactory material in which to pack tea. Red Rose tea is put up only in aluminum, and a "money-back" guarantee goes with every package.

11-W

In his own house, Jack sat with the letters in his hand. Helmi had gone, she had not waited. He was a month late, but Helmi should have waited. Where had she gone?

The letters might tell him—it would be better to know. He opened the first one and found it contained a Government cheque for fifteen dollars payable to Helmi Doran, and it said it was on account of Pte. Arthur Warner. Jack stared at it without understanding.

The other letter was from Montreal. "Dear Helmi," it said, "I have made over my separation allowance to you, and I hope you will accept it from me. You are the only person in Canada who has any claim on me. I have paid every other person in Canada for everything they have ever done for me. You, dear Helmi, I can never pay in money, for you gave me the most precious thing a man can have who goes out as I am going, a memory of something tender and sweet. I have made my will, leaving everything I have to you. I will never forget your last words to me. Nobody ever spoke to me like that before. Will you write to me, Helmi?"

Ever Yours,
Arthur Warner.
(To Be Continued.)

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine
For Nervous, Sleepless
Children

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I tried the tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Jap Pier Was Ambitious

Not satisfied with his first record for night flying, Captain Toshio Kato, of the Japan aviation school at Tokyo, immediately flew again and established a new record. He hopped off at 5:30 o'clock in the evening and broke by 25 minutes his previous record of six hours in the night air. He immediately flew again and remained up until 9:25 o'clock in the morning, beating his previous record of the night by three hours. Most of his flying was in dense fog.

Could Hardly Live For Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This untold relief gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

The time to take care of the coming years is this year.

Love and potatoes must be akin—they both spring from the eyes.

CUTICURA HEALS LARGE PIMPLES

Caused Itching Burning,
Also Disfigurement.

"My complexion was completely marred by pimples which varied in size. Some were large, hard and scaly, while others were just red and festered. They caused an itching, burning sensation, also disfigurement."

After using scores of remedies for over two years, with but little results, I sent for a free sample of Cuticura Soap and Ointment. I was so pleased with the results that I purchased more, and after using two cakes of Cuticura Soap and one large box of Cuticura Ointment I was completely healed." (Signed) W. E. Blackburn, 20 Bellevue Ave., Toronto, Ont.

Use Cuticura to clear your skin.

Sample Each Free by Mail. Address: Canadian Import, "Shanahan, Ltd., Montreal, Quebec, P. O. Box 210, Montreal 2 and 301, Toronto 20.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

WHY "NEW TEETH FOR OLD"?

Perhaps you were wondering why little Sonny had to lose his "baby" teeth and have them replaced with new ones.

Why, you asked yourself, do they not remain permanently and develop in size during the growing years just as do the ears and eyes?

"Because they become decayed," you say; but not necessarily so since tooth decay is a disease and is therefore abnormal and preventable; and for that matter, when you lose a tooth through decay at six and twenty, does a new tooth replace it?

But consider: You have seen a little sapling grow to be a big tree—"large oaks from little acorns grow"—but did you ever hear tell of a small pebble growing to become a large stone? Not likely so, and for obvious reasons, for, as you know, the tree is of organic matter, while the stone is of inorganic.

Obviously too, Sonny's little jaw has no room for the larger teeth that he will need when he is fully grown.

So unlike the potatoes that "from little ones do big ones grow" we have instead, "new teeth for old."

These baby teeth then serve temporarily for mastication until the maxillary or jaw bones are sufficiently developed to accommodate the larger permanent teeth of adult age.

They are mother Nature's expedient, as it were, and a good expedient too, if given half a chance.

Little Helps For This Week

"Inasmuch as ye did it not to one of the least of these, ye did it not to me."—Matthew xxv. 45.

Living, thou dost not live
If mercy's spring run dry;
What Heaven has lent thee wilt thou freely give.

Dying, thou shalt not die.
He promised even so:
To thee His lips repeat.

Behold, the tears that soothed thy sister's woe
Have washed thy Master's feet.
—Oliver Wendell Holmes.

The final test of religion at that last day is not religiousness, but love; not what I have done, not what I have believed, but how I have discharged the common charities of life. By what we have not done—by sins of omission—we are judged. It could not be otherwise. For the withholding of love is the negation of the spirit of Christ, the proof that we never knew Him, that for us He lived in vain.
—Henry Drummond.

No matter how deep-rooted the corn may be, it must yield to Hollo-way's Corn Remover if used as directed.

Recipes For This Week

(By Betty Barclay)

CREAM OF ASPARAGUS SOUP

Wash each stalk of asparagus carefully with a vegetable brush to remove all grit. Then cut in small pieces (using all but the very tough parts). Cook, covered, until the asparagus is tender, in enough water to cover. Add salt to taste just before the asparagus is done. Allow two cups cooked asparagus and cooking water to 2 cups medium cream sauce (2 cups milk, 4 tablespoons flour, 4 tablespoons butter). Season and serve hot.

Note: The less tender part may be cooked longer and put through a sieve. If desired, the tops may be used for salad.

FRUIT BLISS

2-3 cup sugar.
1-3 cup water.
2 egg yolks.
4 tablespoons lemon juice.
Red color paste.
3 cups fruit.

Poil sugar and water five minutes. Pour over egg yolks, cook over hot water until thick, stirring constantly. Add lemon juice and red color paste and chill. Pour over fruit, using peaches, oranges, red cherries and strawberries cut in pieces. Serve very cold. Serves 6.

Enlisting Their Sympathy

Counsel for the victim of a motor-vehicle accident: "Gentleman of the jury, the driver of the car states he was going only four miles an hour. Think of it! Think of the agony of my client, the victim, as the car drove over his body at four miles an hour!"

"I see you are getting all the girls off your hands."

"Yes, but the worst of it is I have to keep their husbands on their feet."

Neutrality succumbs to Minard's Liniment.

THERE is nothing quite equal to Aspirin for all sorts of aches and pains, but be sure it is Aspirin. The name Bayer should appear on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box when you buy it.

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

Salt Essential To Health

Is One Of The Four Prime Necessities Of Life

Salt is necessary to life and health. Deprived of salt, disease and ultimate death would follow. In certain parts of the world where salt is scarce, salt is used in lieu of cash in trade and barter. Salt ranks with water, bread, sleep as one of the four prime necessities of life. A medical man stated recently that the chronic ill-health of many people is due to their under-consumption of salt; they take too little in condiment form, and even less in vegetables, such as cabbages, which contain valuable salts.

Look at your salt-cellar. Each white grain of glistening salt is a perfect crystal. In a tiny pinch there are thousands. They will pass to every part of your body—blood, brain, tissue, and bones—and do their health-keeping work.

Wrong Idea Of Sin

More should be written about the pleasures of virtue. The old theology gave the impression that sin is delightful and that those who forego it give up what is most thrilling in life.—American Magazine.

Minard's Liniment For Toothache.

"Let's look at this budget sensibly, John."

"But you can't save money even on paper."

"But I do. I got fifteen sheets of paper for 10 cents today."

Why Firestone Tires Give Most Miles Per Dollar

The greatest enemy to tire life is not the harsh grind of city streets or rough roads, but heat which is created inside the tire by internal friction. Heat not only weakens the fabric, but also softens the rubber, causing blowouts and tire failures.

The above illustration shows a single cord of a Firestone tire greatly magnified and untwisted into fifteen smaller cords composed of many little fibres.

By means of the exclusive Firestone Gum-Dipping process, every fibre is insulated with rubber, which prevents internal heat and friction.

Your local Firestone Dealer gives you the better service that goes with these better tires. See him today.

News Notes

Pres. H. S. Allen now drives a new Chevrolet coupe purchased from Graham Motors.

Graham Motors recently sold Chevrolet coupes to the Knight Sugar company, Wm. Lind, J. McDougall, Jas. Ramsey, of Milk River, M. V. Sherbourne, of Taber, Miss. Claire Allen of Del Bonita, and a coach to J. C. Robinson, Welling.

The health clinic held by government nurses at the public school finished today and the nurses left for Welling. They will return tomorrow and will be prepared to examine all pre-school age children at 10:30 on Saturday at the public school. The clinic nurse will be at the O. K. school on Monday and at Stirling on Tuesday. The government handling of this work is a financial boon to the school districts and a safeguard to the school children's health.

Dance tonight at the Opera House to the music furnished by King's Kanadians, the new all-star seven-piece orchestra. Showers of balloons will be turned loose, and every balloon will contain money. Couple \$1.00 Extra lady 25c. All are welcome.

Mrs. Marie Sutton, Mrs. Rhoda Brown and her three children arrived here last Monday from Utah for a visit with their parents, Mr. and Mrs. P. J. Christensen.

Mrs. F. B. Milner returned home last week from Salt Lake, where she spent the past winter.

Deal Mendenhall now drives a new Pontiac Sedan.

The Empire Day program given by the school children in the Opera House on June 23 was well attended and much appreciated. It has been suggested that this program be repeated for the morning program of Dominion Day.

News Notes

Mrs. Thos. Allen was chosen as delegate to represent the Raymond Women's Institute at the convention held in the Palliser Hotel, Calgary, this week. She was accompanied by Mrs. A. W. Kirkham and Mrs. J. F. Anderson.

Graham Motors have recently installed Frigidaire refrigerators for Dr. Leech, Grant Card and Wm. Clemis. They are also installing a water pressure system for Dr. D. B. Fowler at Magrath.

Syd Ralph is using crutches as a result of having a horse step on his foot.

A big rousing, colorful melodrama of the French Foreign Legion. Wild adventure, delightful romance in the face of almost certain death. "Beau Sabreur" is coming to thrill you. At the Opera House Saturday night only at 8.20. No dance after.

The Recorder suggests that the subject of celebrating Dominion Day might well be introduced at the next meetings of both council and the trade board. Co-operation of these two bodies should produce a real old time celebration.

R. W. Tollestrup left last Monday for Watrous, Sask., where he will superintend the installation of a new power unit for the Mid-West Utilities. He will be absent for about three weeks.

Mrs. Owen Hill, of Elsinore, Utah is visiting here with her parents, Mr. and Mrs. L. D. King.

Mrs. George Mangan, of Roseburg, Oregon arrived last Monday for a visit to her mother, Mrs. Annie Corleau.

A new cement sidewalk has been laid in front of the Mercantile store. This, with the new metal awning recently painted by Heber Coles, adds much to the store's appearance.

News Notes

A special excursion of cars will go from here to Cardston next Wednesday to take temple workers.

Harry Downes of Mansville Alta. has been transferred to the local branch of the Bank of Montreal. He succeeds Howard Fairbanks, who has been transferred to Calgary.

Mr. Clarke of Nobleford, has been transferred to the local branch of the Bank of Montreal. He succeeds Dick Smith, who has been transferred to Ponoka as assistant.

A Challenge

Frank Pilling hereby challenges Jack Ellison to a wrestling bout, in the interests of the Aetna and Cardston Baseball Clubs. Aetna has entered the Boundary League and Cardston the Southern Alberta League, and as the teams of these two towns are badly in need of funds Frank Pilling proposes that the entire gate shall go to the respective team instead of to the winner. Thus, if Pilling wins Cardston gets the gate; if Ellison wins, Aetna gets the gate.

"Now if Jack Ellison won't accept this challenge," says Pilling, "tell him to name his own terms and I will accept them, no matter what they are." That puts it up to Jack.—Cardston News

Mountains Splendor Open to Motorists

A new 24-hour motor detour of 142 miles along perfect motor roads through the Canadian Rockies is announced by the Canadian Pacific Railway, which states that the trips will run every day in each direction from either Banff, Alta., or Golden, B.C., beginning on June 15 and ending on September 5. By this detour a traveler can leave the train either at Banff or Golden, stay the night at Lake Louise, and continue the motor drive next morning, rejoining the train that afternoon.

This new motor road, built by the Canadian Government through Rocky Mountain National Park and Yoho National Park, is a very magnificent one. At one point it rises to a height over a mile above sea level, while at the highest point it is nearly three-quarters of a mile higher than at its lowest level. Nearly forty mountain towers in the vicinity of the road, and gigantic glaciers, roaring rivers, deep canyons and primeval forests abound. Wild mountain game are also met with in abundance at the roadside.

Motoring in the Canadian Rockies is the tourist's keenest delight, more especially after a railway journey. For this reason a schedule has been drawn up for the season of 1928, to coincide with the arrival and departure of trains at Banff, Field or Golden.

The large touring cars used for this trip are commodious and comfortable, with facilities for hand-

Upper right—The swirl of the fast waters of the Kicking Horse River harmonize with the throb of the engine. Lower right—Every curve of the road reveals greater beauty such as the undisturbed magnificence of the Minnawanka Lake. Upper left—The highway is fringed with thick woods as shown in this scene, looking towards Castle Mountain.

cuts through high rock walls and is spanned at intervals by tiny rustic bridges, reminders of Japanese prints. The canyon is deep and cool, and the walk of 30 minutes is delightful.

Lovers of nature should rise early at Lake Louise to see the coloring on this gem of mountain lakes, for the glaciers and high peaks are diffused with superb shades of rose and gold. A beautiful spot on this trip is Wapta Bungalow, a veritable village of camps resting on the edge of the source of the Wapta River. The Yoho Valley is beautiful beyond imagination, a virgin country unscarred by fires. Takakaw Falls are at the end of the valley and come tumbling down in a lacy pattern almost 1,500 feet. The Yoho Camp is a few hundred yards away. Emerald Lake, seven miles from Field, is a vision of sylvan loveliness, and a Swiss chalet adds to its attractiveness. From Field to Golden the highway follows the Kicking Horse River most of the way and the scenery is spectacular, the road hugging the mountain-side, with the river 700 feet below.
